6	Mon 5 (Gerben) — IEM	Vocals, Bass, Guitars
11	OUT L	—
12	OUT R	—

SOUND

FOH & MONITORS

Isabeau travels with its own sound technician. When possible, he brings his own mixer, stagebox and mics. If this is not possible, please provide the specifications of the available mixer and the patch list of the day.

If our own FOH mixer is used, the organization must provide: a Cat5 cable to connect the stagebox from stage to FOH, and an L/R connection to send the mix to the FOH — with no compression or EQ applied. A direct connection to the sound system is preferred.

If our sound technician cannot join, please provide a qualified sound engineer, and note:

- The mix should be punchy, with vocals on top.
- The samples should be present.
- Backing vocals should sit 6dB lower than the main vocals — minimal extra compression is needed, as the track is already compressed.
- Most solos come from the guitarist stage right (Stef) — make sure the solos are heard.

Monitors: at least 3 on stage (4 preferred), connected to the stagebox. Gerben (drums) and Frank (bass) use in-ears, both connected via XLR.

HOSPITALITY RIDER

ON-SITE REQUIREMENTS

- At least two paid parking spots near the venue for easy load-out.
- Bottled water on stage during the performance.
